**Sprint 1 Plan**

**Goal** Get the landing page designed, user signup and login working, email confirmation, settings panel for company and user, and manager declaration.

**Web Tasks**    **Note** The bold number is a planning poker time estimate

1. Configuring Heroku with all Ruby on Rails contributors (Shivam & Jesus) **6**
2. Making all models and associations for users, companies, departments, locations, and login backend **5**
3. Design the homepage & come up with marketing material **8**
4. Configure the login system with Bcrypt and modify the User object to accommodate the password digest field **4**
5. Configure the signup process to send out a confirmation email **10**
6. Make a forgot password feature, also uses emails **7**
7. Using RORs scaffold feature, modify the \_form.html.erb with settings **3**
8. Workout the permissions of what users are permitted to see and what they aren't **9**
9. Create a Terms of Service page **3**
10. Learning Ruby on Rails **20**

**Android Tasks**    **Note** The bold number is a planning poker time estimate

1. Setup basic navigation **3**
2. Setup boilerplate code **5**
3. Learn 3rd Party Libraries **10**
4. Design layouts **4**
5. Set up application architecture **5**

**Team Roles**

1. Jesus Alcaraz - Web Product Manager
2. Jose Calles - Android Developer & SCRUM Master
3. Shivam Dave - Web Developer
4. Glenn Dayton - Web Developer & Product Owner
5. Raul Lopez-Luna - Android Developer
6. Joseph Ou - Android Developer

**Initial Task Assignment**

- |  |    |
|--|----|
| 1. Jesus Alcaraz [WEB] - 10                    | 20 |
| 2. Jose Calles [ANDROID] - 1, 2, 4, 5          | 17 |
| 3. Shivam Dave [WEB] - 9, 10                   | 23 |
| 4. Glenn Dayton [WEB] - 1, 2, 3, 4, 5, 6, 7, 8 | 52 |
| 5. Raul Lopez-Luna [ANDROID] - 1, 3, 4         | 17 |
| 6. Joseph Ou [ANDROID] - 1, 3, 4               | 17 |
